Ex parte Quayle Action

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. This application is in condition for allowance except for the following formal matters:
 - In Specification p. 5, line 33; "the traverse rack 34" should be changed to --The lateral slider 40--.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

- As the closest reference, Saito (US 6,208,606) shows a motive-force transmission changeover mechanism in a disc apparatus including: a traverse unit; an optical pickup fixed on the traverse unit and adapted to run on parallel guide rails laid on a chassis of the traverse unit; a traverse holder holding the traverse unit, a drive motor; and a disc-carrying tray to carry a disc for loading and unloading, an optical pickup drive mechanism having a traverse rack

Art Unit: 2656

integrally connected to the optical pickup, and a gang of gear wheels to be detachably connected to the traverse rack for transmission of driving power of the drive motor; a traverse unit inclining mechanism, and a tray driving mechanism including a tray rack, and a tray feeding gear wheel concentrically combined with the tray feeding pinion; **but fails to show** the traverse unit inclining mechanism having a lateral slider (element 40 in this invention) having an oblique cam slot and a rack, a forward projection of the traverse holder slidably fitted in the oblique cam slot, and a tray feeding pinion detachably mesh with the rack of the lateral slider, and the tray driving mechanism including an L-shaped cam slot (element 22 in this invention) formed on rear surface of the disc-carrying tray.

- Applicant asserts: "the present invention is to provide an improved motive-force transmission changeover mechanism for use in a disc apparatus capable of working together in unison by a single motor, the pads of the motive-force transmission changeover mechanism being simple, well timed and reliable of the transmission changeover, and the size can be reduced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record in PTO-892 Form and not relied upon is considered pertinent to applicant's disclosure.
